

IMPACT GRID MODERNIZATION

The GridWise Alliance – ensuring America's electricity grid supports our economy's changing needs

Our Vision

Transform the electricity grid to meet the rapidly changing needs of America's economy.

Our Mission

To champion the principle concepts, policies, and investments needed to transform the electricity grid by understanding the diverse perspectives and priorities of all stakeholders; crafting action plans and strategies that articulate the benefits of the changes required.

The GridWise Alliance and our members believe that the electric grid and its supporting infrastructure is the foundational component of an advanced digital economy.

GridWise uniquely serves the electricity industry by leveraging diverse stakeholder perspectives to articulate the numerous benefits of grid modernization.

Three Initiatives Bring Clear Member Driven Value

Grid Investments for Economic Recovery

\$25 BILLION FOR GRID MODERNIZATION IN STIMULUS LEGISLATION

Advocating for the inclusion of funding for grid investments in any stimulus package Congress develops in response to the economic downturn and the global pandemic.

GridWise Alliance Faces of Grid Mod initiative is creating a vehicle to visually explain the importance of the grid from our member's perspectives to supplement policy and regulatory grid improvement recommendations.

gridCONNECT is the vehicle to augment our policy and technology messages to the broader stakeholders. We share case studies and best practices from our members and supporting organizations to highlight the need for grid investments.

ADD YOUR PERSPECTIVE TO GMI

2021 Grid Modernization Index (GMI)

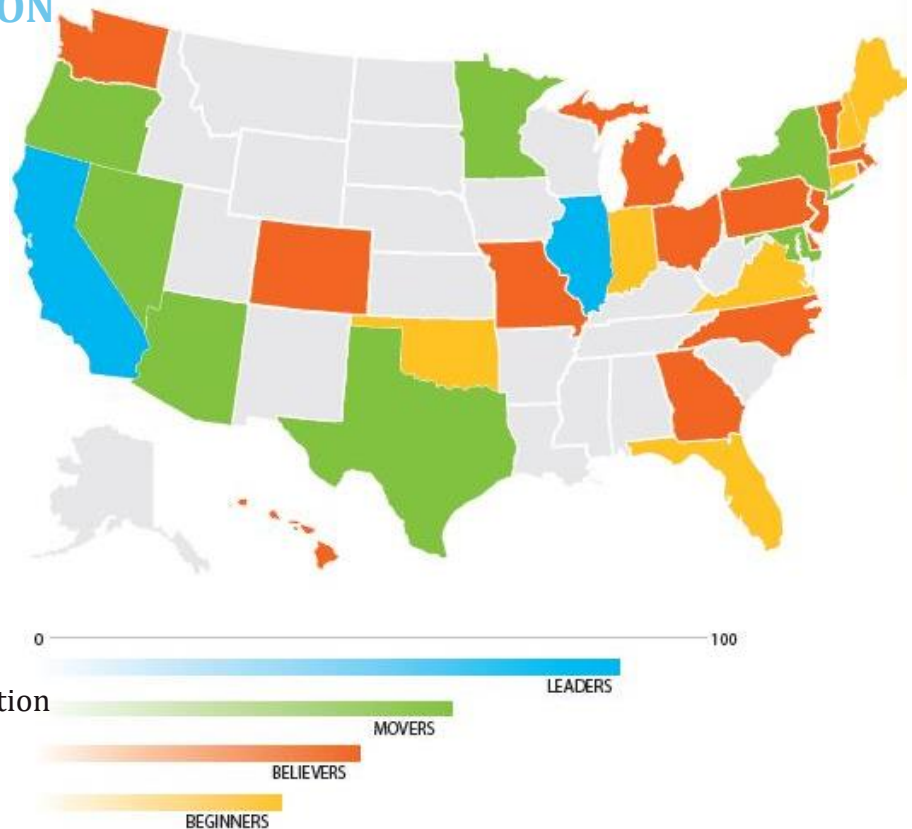

The GridWise Alliance's Grid Modernization Index (GMI) is widely recognized across the industry as a resource that benchmarks states on a wide range of grid modernization policies, practices and investments; providing insights into the progress and various approaches.

STAKEHOLDER PARTICIPATION

To support the development of the 2021 GMI, we welcome your input to ensure that we include the most current information for each state's grid modernization efforts. If you are interested in serving as a Governor's office or State Commission point-of contact for our staff to work with on data collection, please contact Richie O'Neill at roneill@gridwise.org.

DATA COLLECTION

The GMI data input process consists of answering a series of questions that can be accessed through an online portal. [You can access and review the Data Collection Portal here](#). Questions are segmented around key topical areas of grid modernization. Each area should take you less than 15 minutes to complete and you don't need to complete each section fully for your responses to count.

Become a Member

Full Membership levels are based on annual revenue or organization type. Annual dues:

> \$1B / \$20,000
\$100M - \$1B / \$15,000
\$10M - \$100M / \$7,500
< \$10M / \$3,000
Rural Electric Cooperatives / \$3,000
